

Agrinatura Newsletter 03/06/2024

Dear Agrinatura members, partners, and colleagues:

In Agrinatura we are exploring ways to improve our communication and share with you relevant information about events, courses, webinars, vacancies, etc. This is the latest version of the newsletter, although I have received positive feedback, this version has integrated some suggestions from previous versions. Please feel free to give us feedback.

Many recipients are students who could be the next generation of experts who could reinforce sustainable agriculture and development activities. Please help us get this information to them too.

Agrinatura members announcements

ICA Reminder

General Assembly 2024, will be held Online on Thursday 6 June from 15.00 to 17.00 CEST by ZOOM. The General Assembly is open to all staff and students from ICA Member Institutions, all are most welcome to participate in the meeting. Registration form [HERE](#)

Tropentag 2024

Hybrid conference (Vienna and online), September 11-13, 2024
'Explore opportunities... for managing natural resources and a better life for all'

ATSAF is also for Tropentag 2024 seeking Student Reporters to increase the conference's outreach.

The application is open to students affiliated with a European university with great interest in the Tropentag topic.

Agrinatura Tropentag Travel Grants for Agrinatura participants

A brief reminder for our members: Agrinatura will award travel grants of 300 EUR to 8 students from Agrinatura member institutions. To be considered, students must submit their **accepted abstracts (20th June 2024)** from the Tropentag conference committee to the Agrinatura selection committee at secretariat@agrinatura-eu.eu. The committee will then select the 8 recipients. For eligibility details, please visit our website [HERE](#)

Calls

Bonnes pratiques d'adaptation menées par les paysans pour gérer les effets négatifs du changement climatique sur l'agriculture/ Implementing a project to showcase best practice examples of farmer-led adaptation in managing the negative impacts of climate change on agriculture.

Global food policy report 2024: Food systems for healthy diets and nutrition.

Food systems and diets are central to challenges like malnutrition, noncommunicable diseases, and climate change. Sustainable healthy diets can improve both human and planetary health. The 2024 Global Food Policy Report examines how food systems impact nutrition and explores ways to ensure healthy diets for all. IFPRI researchers and partners highlight methods to improve diet quality, food accessibility, and affordability, focusing on vulnerable populations in low- and middle-income countries. Regional sections address diverse challenges and promising policies for sustainable diets. **Full text available at:** <https://hdl.handle.net/10568/141760>
